

# LEGEND

## Rock Types

### Footwall

- 11 - meta tuff
- 12 - quartz augen schist
- 13 - meta dacite
- 14 - chlorite/phyllite
- 15 - biotite schist

### Ore Zone

- 20 - quartz sericite schist
- 30 - meta chert
- 40 - massive sulfide

### Hangingwall

- 51 - quartz augen schist
- 52 - andalusite biotite schist
- 53/54 - meta dacite / chlorite/phyllite
- 56 - sericite clay schist

### Other

- 60 - sandstone
- 70 - glacial till
- 90 - gossan

## Structural Symbols

- fault - located +/- 2'
- - - fault - located +/- 5'
- - - geologic contact - located +/- 2'
- - - geologic contact - located +/- 5'
- strike and dip of contact
- strike and dip of fault
- foliation strike and dip
- major joint set strike and dip

FINAL PIT WALL GEOLOGY  
 FLAMBEAU MINE  
 LADYSMITH, WISCONSIN

mapping by Raymond Vost  
 Aug. 1995 through Apr. 1997  
 compilation and drafting by  
 Raymond Vost  
 Mar. 1997 through May 1997  
 c:\vost\cd\final.dwg 5/28/97

prepared for Flambeau Mining Company May 29, 1997
